

Kitchen Design Trend: The Furniture Kitchen

By Kitchen Enthusiast

Dated: Oct 15, 2009

The art of the Furniture Kitchen design is best shown in pictures, so the Kitchen Enthusiast has updated their on-line portfolio with over 200 pictures.

New trend in kitchen design: Furniture Kitchens. If you look at current kitchen design, you may have noticed that the look is "fancy" compared to just a few years ago. This new look is what I call the Furniture Kitchen. To obtain this look, a skillful use of cabinet accessories is needed. I say skillful because if you go to some home warehouses, you will see the use of these accessories or accoutrements but they fall flat. Since design is a tricky thing the Kitchen Enthusiast has updated their web presence to include a collection of 209 kitchen pictures of projects dating back to 2004. These are kitchen remodel and room additions in the south bay (San Francisco bay) area, including Los Gatos, Monte Sereno, San Jose, Willow Glen and Almaden Valley. If you would like more information about our services you can call Everett Lakoduk at (408) 354-3507.
